The ECVET mobility toolkit

Support for integrating ECVET into new or existing Mobility Practice

www.ecvet-toolkit.eu

The toolkit is an online platform to assist European Vocational Education and Training providers in the implementation of ECVET in their geographical mobility measures/projects.

The toolkit provides not only information about ECVET, but also practical and hands-on tools and examples for the introduction of ECVET principles to the different mobility phases:

Video interviews show experienced mobility practitioners from different countries, presenting their own experiences of using ECVET.

A step-by-step process towards higher quality mobility

1. Reflecting on current mobility practice

- added value
 - good practice
 - ambition
- * consider the importance of international mobility for your learners*
** appreciate what works well in your current mobility practice*
** envision how you might further develop*

2. Exploring the toolkit

A **user guide** helps you to navigate through the toolkit and a checklist confirms both key actions and key actors - as you work through the toolkit, it can also be useful to ask yourself:

- changes
 - goals
 - opportunities
- * what's new?*
** how could this help you in realising your ambitions?*
** what (additional) opportunities do you see?*

3. Building partnership

- shared purpose
 - shared goals
 - shared views
 - common understanding
- * confirm with new and existing partners a willingness to experiment with Learning Outcomes & ECVET*
** decide which elements of ECVET you will implement together*
** agree on elements that might require the participation of other actors*
** outline the roles and responsibilities of all partners in a Memorandum of Understanding*

4. Implementing ECVET

- phased implementation
 - piloted implementation
 - guided implementation
- * consider each of the mobility phases (**before-during-after**) and on the changes that ECVET might require*
** undertake pilots with actual mobility participants*
** use the checklists, templates and examples provided in the toolkit*

5. Evaluating with participants and partners

- successes
 - areas for improvement
 - need for (peer) learning
- * confirm the benefits of having introduced ECVET, seeking input from partners and participants*
** reflect on pilot implementation and consider how you might do things differently in the future*
** invite yourself, your colleagues and your partners to participate in Communities of Practice*

Need support? Contact your National Agency for Erasmus+. Country details are provided in the toolkit.
